Asset Management Filtration Station
Ensure clean fluid in critical equipment

FAST Fifteen

Give us 15 - we will give you targeted fluid cleanliness concepts **for your machine.**

Schroeder INDUSTRIES

Matt Brown/Product Manager Filter Systems

Applications for AMFS cart

- Owners and operators of fleets of multiple assets

- AMFS will record and store the ISO and saturation levels for each individual asset in a preconfigured excel file

- Data can be used by maintenance departments & quality departments

- Manager to track and trend the assets

- Trending will provide information and data to perform predictive maintenance to greatly reduce breakdowns in the field due to contaminated fluid.

Applications for AMFS cart

- The on board computer stores each maintenance event to individual asset.

- All test reports are easily download to a thumb drive in an Excel file format

- AMFS will greatly reduces the paper work for the maintenance manager.

Requires operator to enter 4 fields to start the unit
- Asset #
- Operator ID
- Hours Operation
- Desired ISO codes
