Part of the Schroeder Industries 2030 Initiative				Health
				MCS
			-	EY-1356
The Starter Kit #1 allows users to visually assess real-time fluid condition for predictive maintenance. This plug-and-play starter kit is easily integrated into higher control networks such as PLCs, supervisory control and data acquisition (SCADA) platforms, and distribution control systems (DCS).			Description	AS1000
			AS3000	
			In The Kits	HLB 1400
TCM-FC	TCM-FC-W	TCM-FC-WD	III IIIe KIG	EDS 3400
<ul> <li>Measures particle contamination per ISO 4406:</li> </ul>	<ul> <li>Includes everything in TCM-FC with the</li> </ul>	<ul> <li>Includes everything in TCM-FC with the</li> </ul>		EDS 8000
1999 and SAE 4059(D) on CS 1000	additional content below:	additional content below:		
<ul> <li>Manifold mounted with</li> </ul>	Measure fluid temperature and relative water content	<ul> <li>Measures fluid temperature and relative</li> </ul>		HDA 4300
pressure-compensated flow	as percent saturation on	water content as percent		
control valve and 1620 test point fitting (test points	AS1008 (no display)	saturation on AS3008 (built-in display)		
included)	Sensor Cable	Sensor Cable		
Microbore Hoses	<ul> <li>One M12x1, meter sensor</li> </ul>	<ul> <li>One M12x1, meter sensor</li> </ul>		
Two 0.9 meter microbore hoses	cable (one (1) 5-pole with	cable (one (1) 5-pole with		
1620 connectors	flying lead)	flying lead)		
Sensor Cable				
One M12x1, meter sensor cable (one (1) 5-pole with				
flying lead)		I		
Minimum Inlet Pressure 1	25 psi (8.6 bar)		System Requirem	ents
Minimum Flow Rate 0.03-0.07 gpm (100-250 mL/min)				
Permissible Viscosity Range 3	2-4,635 SUS (1-1,000 cSt)			
Permissible Fluid Temperature 3	2-185° <b>F (0-85°C)</b>			
	lineral-based oils [C/F for other fluid			
Mounting Configuration V	ertical orientation with direction of flo	w South-to-North through manifold		
How to Build a Valid Mod	el Number for a Local Data	Display Starter Kit #1:	Model	
BOX 1	BOX 2		Selection	
TCM-F	C –			
Example: NOTE: One option per box				
BOX 1 TCM-F	C - WD = TCM-FC-WD			
		 2 אר		
BOX 1     BOX 2       Starter Kit     Water Sensor Option				
TCM-FC = Contamination Sensor On Manifold W = Water Sensor				
WD = Water Sensor with Display				
	N/A = None		•
